**Prechtl's method of
qualitative assessment of
general movements**

**Basic and Advanced
Training courses**

**1st - 3rd December 2014
London UK**

Course Tutors

Professor Christa Einspieler (Graz)
Professor Fabrizio Ferrari (Modena)
Nataschia Bertoncelli (Modena)

Course Directors

Professor Christa Einspieler
Institute of Physiology,
Medical University of Graz
Harrachgasse 21, A-8010 Graz
Phone: +43 316 380 4266
E-mail: christa.einspieler@medunigraz.at

In collaboration with:
Dr Angela Huertas-Ceballos
Consultant Neonatologist
University College London Hospitals

Basic Course Outline

General movements are the most frequent motor pattern in the fetus and in the young infant. The aim of the course is to provide an introduction to Prechtl's Method of Qualitative Assessment of General Movements in young infants. This new assessment method has shown its merit for the prenatal and postnatal evaluation of the integrity of the nervous system. Compelling evidence is now available that qualitative assessment of General Movements (GM) at a very early age is the best predictor for cerebral palsy. This method has become a potent supplement to the traditional kind of neurological examination.

Main topics of lectures, demonstration and exercises are the ontogeny of spontaneous motor activity; normal and abnormal GMs from

birth to 20 weeks post term; practical advice for recording and assessment of GMs; GMs and follow up; individual developmental trajectories and their predictive power for later neurological impairments.

Participants will be required to undertake a final test in order to receive a certificate of reliability in this method of assessment.

A certificate of attendance will be available to all participants at the end of the course.

Course Programme - Main Topics

- Development of GMs in the preterm and post-term period
- Clinical importance of studying GMs
- Main abnormal features of GMs
- Practical advice for GMs assessment
- GMs and cerebral palsy

Advanced Course

The advanced course is for those who have already attended a basic GM training course and passed its final test. Participants on the advanced course are invited to bring their own recordings and case studies for presentation and discussion.

Participants will be required to undertake a final test in order to receive a certificate of advanced reliability in this method of assessment.

Both courses fulfil the standards specified by the GMs Trust
(www.general-movements-trust.info)

Course details

The training will commence on Monday 1st December 2014 and finish on Wednesday 3rd December 2014 at 5pm. Full attendance on all 3 days is required. Lectures will alternate with exercises in small groups with video presentations.

Course fee: £700

Fee includes course teaching materials and morning and afternoon refreshments. Accommodation and lunch are not included. There are many cafes in close proximity to the teaching venue where it will be possible to buy lunch.

The Venue for the course is:

UCLH Education Centre
1st Floor
250 Euston Road
London NW1 2PG

Further details regarding travel and hotels in the area will be sent once your place has been confirmed. Please note places on these courses are strictly limited and early application is highly recommended. Once the courses are full no further applications can be accepted.

Payment should be made to **UCL Hospitals Charities 0924** and a cheque for the full amount sent with your application form will help secure your place.
